

## POWER CONNECT TREE:

-If any of the sections are not working:

1. Please explain to customer there is a plug at the end of the last light set that plugs into the pole. Make sure it is plugged in securely.
2. There is a sticker on the end of the poles indicating that if the lights don't work, please clean inside the pole with a dry cloth or use compressed air to make sure there is no dust which may interfere with proper connection.

2" x 2" Label for PowerConnect Tree pole

**Pole Connection Notice:**

Note that if the section lights do not illuminate, it is possible that the contacts inside the female pole connection need to be cleaned. Use a vacuum or compressed air to remove dust and debris from the receptacle. Wiping contacts with a dry cloth is also recommended.

3. If the lights are not working, we can ship complimentary lights and have customer call back in January for repair. If the lights don't work because of the connection in the pole, there are no replacement parts. Customer must return to store.
